### **Product Up gradation:**

Informatics360 provides services in upgrading Clients products. Our expertise in varied domains helps us quickly modernize existing products.

## Industires

### **Finance**

Intense competition in global market make financial services one of today's most dynamic industries.

### **Litigation**

Litigation involves a large set of people requiring mutual access to critical case documents and transcripts; in situations such as class actions, multi-party, multi-district litigation or joint defense groups.

### **Industrial**

Accurate cost and resource estimation can lead to enhanced productivity and optimized cash flow within an industry. In order to compete on a large-scale, industries need the most optimum solution to approximate their existing resources, keeping in mind the growing demand for large and complex industrial projects. The entire process of project bidding plays a vital role in an industry's profitability .

### **Material Management**

Now more than ever, your ability to manage growth, control costs, and respond rapidly to change is directly related to the flexibility and scalability of your enterprise system.

### **Real Estate**

As the real estate business changes, you the user must be able to spend your time with clients.

### **Repair & Service**

Despite being bundled as 'Service and Repair' organizations, each company is different depending up what it services and repairs.

## Testimonials

*"Informatic360 has been a great partner for us. They exactly understand what we need and always develop solutions that help us achieve greater success. Informatics360Tech has delivered great value with their software products. Informatics360 projects are never 'typical' and always well thought out to accelerate our business processes."*

**Steve Poore**

*"Informatics360's best feature, for me, has always been their "team-development" approach to every software project and their true professionalism. All aspects of development were always handled with care and consideration. Informatics360's knowledgeable and professional staff lead me through each step of program evolution and always kept my objectives in mind."*

**Susan Reuter**

*"Informatic360 have been partners with us from the very beginning throughout every stage of our site development from Analysis, Design and Programming. A one-stop IT company, and an essential component of our business."*

**Mr. Ray**

*"Informatics360's people are very good. They never rush into anything. Thoughtful behaviour is what I like the most in their work. Their response time is amazing. It seems they're always there to help and advise. Updates/changes are never a problem. They're the most considerate guys out there. When a company works on a project as if it is their own, you know they care. They offer much more than value for money. I wouldn't work with anyone else and I would recommend them to the world! No project is too big or too small. I cannot imagine working with anyone else. They helped me out at a very difficult and personal time, for which I will always be grateful. They are number one! Thanks a million guys."*
